

## Anarchy!

The old king has died, leaving his young son not yet ready to rule the kingdom. The minority of the young king will last another year, during which anarchy reigns!

Eight of the most powerful lords of the kingdom will take advantage of this period of anarchy, bolstering their own power in order to have the most influence over the young king when he takes control.

Build stout castles, train faithful knights, draft a multitude of footmen, and set about your opponents to take as much of their land and gold as you can over the next twelve months.

Good luck!
